DATE MAILED:

Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

Newly amended claim 1 and newly submitted claims 50-58 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the amendment now has claims directed to a method of decreasing levels of interleukin-6, whereas the prior claims were directed to a method for modulating cell death.

The examined invention and the newly added invention do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature between the groups is not a special technical feature. The common technical feature is pyridoxal-5-phosphate. Pyridoxal-5-phosphate is already known in the art as being useful to treat cerebrovascular disease; for example, see U.S. 2001/0056081. Therefore the common technical feature is not Applicant's contribution over the prior art. Accordingly, the common technical feature is not a special technical feature. Thus, a restriction is proper.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 1 and 50-58 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHRIS E. SIMMONS whose telephone number is (571)272-9065. The examiner can normally be reached on M-F from 8 to 5 pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frederick Krass, can be reached at on (571)272-0580. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
